JOB TITLE: Graduate Games Developer

LOCATION: Liverpool, City Centre

SALARY: TBD

REPORTS TO: Head of Gaming Products

PRIMARY PURPOSE

Magellan are looking for enthusiastic and passionate individuals to join their virtual games team. As part of the team you will be directly involved in delivering updates and new features to their existing v-sports products as well as supporting the configuration and rollout of their software and hardware into betting shops around Europe.

KEY RESPONSIBILITIES

- Work on individual features and bug fixes.
- Test your implementations in order to deliver production ready code.
- Develop your skills were required to find bespoke solutions to business needs.
- Supporting IT teams across Europe to correctly configure games systems.

KNOWLEDGE, ATTRIBUTES, SKILLS

- Good programming skills – Experience writing C#
- Experience in Unity3D – Ideally demonstrable experience.
- Good knowledge of the windows operating system
- Eager to get involved in all aspects of product delivery
- Focused on delivering quality bug free code
- Able to work autonomously yet ask for support openly
- Be keen to work towards best practises and standardisation
- Outstanding interpersonal skills and the ability to establish positive relationships

DESIRABLE SKILLS

- Knowledge and experience of Artificial Intelligence
- 3D Maths
- Experience with git or some version control software
- Good knowledge of Linux operating system

COMPANY AND WORKING CULTURE

You will be working at our European HQ, based in Liverpool City Centre, the environment is fast paced and dynamic, your colleagues will be people from all over the continent, reflecting our business reach across Europe. Our team is made up of Games Developers and 3d Artists who are extremely driven to produce the best possible product available on the market. Magellan is a fast paced business and as such people who are responsive and keen will learn a lot here and have the opportunity to hone their craft.
